(Natural News) With an increasing number of people becoming aware of graphene oxide being identified in covid vaccines, a company called INBRAIN Neuroelectronics demonstrates that graphene-based "neuromodulation" technology using AI-powered neuroelectronics is very real.

A March 30th, 2021 press release published by BusinessWire.com reveals the story:

### INBRAIN Neuroelectronics Secures \$17 Million in Series A Funding for First AI-Powered Graphene-Brain Interface

*Funding enables company to advance first-in-human studies for its flagship product, a less-invasive neuromodulation device for treating neurological conditions using artificial intelligence and graphene electrodes*

disease.” The point of covering INBRAIN is to reveal that brain-controlling “biocircuits” based on graphene are, in fact, a very real technology.

So-called “fact-checkers” — which are nothing more than disinformation propaganda pushers — routinely claim that graphene isn’t found in vaccines and that graphene biocircuits are a conspiracy theory. INBRAIN Neuroelectronics shows that the fact checkers are lying.

In fact, as INBRAIN says in their own press release, they are, “aiming to establish the safety of graphene as the new standard of care for neurotechnology devices.”

They also describe graphene biocircuits as a kind of platform that can be upgraded:

*Less invasive and more intelligent neuroelectronic technologies like ours could provide safer therapies that are upgradable and adaptive in real time...*

If that sounds familiar, it’s probably because Moderna, creator of the mRNA covid vaccine, has described its technology as an “operating system” that can be updated and reprogrammed at any time, also.

At the [INBRAIN Neuroelectronics website](#), the company describes itself thusly:

*We are scientists, doctors, techies and humanity lovers, with the mission of building neuroelectronic interfaces to cure brain disorders. We use GRAPHENE, the thinnest material known to man to build the new generation of neural interfaces for brain restoration to help patients around the world.*

It also quotes Prof. A. Fasano, saying, “Graphene is the next big thing in bioengineering materials, which are pillar components to the next gen of electrotherapies in the steadily growing field of neuromodulation.”

The company highlights its technology as being able to “read” a person’s brain, detect specific neurological patterns, and then control that person’s neurology to alter their brain function. In their own words:

*Our graphene brain interfaces have the capability of reading at a resolution never seen*

*adaptive neuromodulation for increased outcomes in personalised neurological therapies.*

Graphene is further described as, “Thinnest known material to perfectly adapt stimulation to targeted brain anatomy.”

Anyone saying that graphene isn't being used to control human neurology is either wildly ignorant of the state of modern neuroscience or is deliberately lying to you.

To clarify yet again, we are not stating that INBRAIN Neuroelectronics is engaged in any sort of nefarious agenda, nor that they are involved in covid vaccines. As with every technology, **graphene-based biocircuits can be used for both good or evil, depending on the ethics and motivations of those who control the technology.**

There are no doubt very positive applications for this tech, but as with most technologies that were once touted as empowering humanity — television, vaccines, the internet, nuclear power, robotics, etc. — they all end up in the hands of lunatic, genocidal globalists who wield them as weapons against humanity.

In other words, there is no technology that madmen won't exploit to enslave humanity and increase their own power and control. Graphene biocircuits give power-hungry lunatics direct access to your brain, and according to many analysts (see below), vaccines provide the excuse to inject human victims with graphene-based substances that self-assemble into biocircuits in the human brain.

## **CLAIM: Covid vaccines contain high levels of graphene oxide, which is self-assembled into biocircuits by harvesting elements (such as iron) from human blood**

As [reported by Orwell.city](#), a group called La Quinta Columna has analyzed covid vaccines and has found that 98% to 99% of the non-liquid mass in the vaccine appears to be graphene oxide. Ricardo Delgado, speaking for La Quinta Columna, says:

*A phenomenon that for a long time was denied, but today has been already proved. There are millions of videos of people going around the world. Videos about this phenomenon of, let's call it 'pseudo-magnetism acquired after inoculation', but it can also be acquired*

*only magnetism, but that could act as energy capacitors, because I have also measured in a multimeter an important charge...*

*This is a phenomenon of electromagnetic induction in the metal that adheres near the inoculation area. In addition, we have found that the magnetism then moves towards the head. And this is very important. Surely for the purpose they may seek. In addition, a potential difference is measured with a multimeter: the person becomes a superconductor. That is, it emits and receives signals. And when we found the materials that can cause this type of alterations in the body, we began to talk about graphene. We suspected it was graphene oxide since it had all the characteristics that magnetized people expressed after inoculation.*

*Graphene is toxic, it is a chemical, a toxic chemical agent. Introduced in the organism in large quantities, it causes thrombi. It causes blood clots. We have all the scientific articles to back it up. It causes post inflammatory syndrome, it causes alteration of the immune system. And when the redox balance is broken, in the sense that there is less of the body's own reserve glutathione than an introduced toxicant such as graphene oxide, it generates a collapse of the immune system and a cytokine storm. In other words, something very similar to the fashionable disease, isn't it?*

Delgado goes on to state:

*And given that all the people who are inoculated with the Pfizer vaccine, which was the one we sent for analysis, as well as Moderna, AstraZeneca, Johnson&Johnson, Janssen, Sinovac, and all types of vaccines acquire magnetic properties, we suspect with many indications that they all contain more or less doses of graphene, of graphene oxide.*

*...we know that precisely N-acetylcysteine or glutathione itself degrades graphene oxide. That is why we think that we probably hit directly on the causative or etiological agent of the disease.*

In today's Situation Update podcast, I cover more details of this exotic nanotechnology, including "self-assembling" graphene biocircuit nanostructures, and how these may be building an antenna to receive commands or instructions from external electromagnetic fields.

If this is what's happening, it means global governments might be able to control the vaccinated masses by broadcasting signals from 5G cell towers. Although it sounds like

involving both SPIONs (Super Paramagnetic Iron Oxide Nanoparticles) for targeted tissue drug delivery as well as “magneto” proteins that achieve neuromodulation (brain control).

In today’s podcast, I also discuss Elon Musk’s underground tunnels and underground cities / bases, as well as why I think globalists have knowledge of an **extinction-level event** that threatens the very survival of human civilization. Full details here:

**About the author:** Mike Adams (aka the "Health Ranger") is a best selling author (#1 best selling science book on Amazon.com called "Food Forensics"), an environmental scientist, a patent holder for a cesium radioactive isotope elimination invention, a multiple award winner for outstanding journalism, a science news publisher and influential commentator on topics ranging from science and medicine to culture and politics. Follow his videos, podcasts, websites and science projects at the links below.

Mike Adams serves as the founding editor of NaturalNews.com and the lab science director of an internationally accredited (ISO 17025) analytical laboratory known as [CWC Labs](#). There, he was awarded a [Certificate of Excellence](#) for achieving extremely high accuracy in the analysis of toxic elements in unknown water samples using ICP-MS instrumentation. Adams is also highly proficient in running liquid chromatography, ion chromatography and mass spectrometry time-of-flight analytical instrumentation. He has also achieved numerous laboratory breakthroughs in the programming of automated liquid handling robots for sample preparation and external standards prep.

The U.S. patent office has [awarded Mike Adams patent NO. US 9526751 B2](#) for the invention of "[Cesium Eliminator](#)," a lifesaving invention that removes up to

95% of radioactive cesium from the human digestive tract. Adams has pledged to donate full patent licensing rights to any state or national government that needs to manufacture the product to save human lives in the aftermath of a nuclear accident, disaster, act of war or act of terrorism. He has also stockpiled 10,000 kg of raw material to manufacture Cesium Eliminator in a Texas warehouse, and plans to donate the finished product to help save lives in Texas when the next nuclear event occurs. No independent scientist in the world has done more research on the removal of radioactive elements from the human digestive tract.

Adams is a *person of color* whose ancestors include Africans and American Indians. He is of [Native American heritage](#), which he credits as inspiring his "Health Ranger" passion for protecting life and nature against the destruction caused by chemicals, heavy metals and other forms of pollution.

In his laboratory research, Adams has made numerous food safety breakthroughs such as revealing rice protein products imported from Asia to be [contaminated with toxic heavy metals like lead, cadmium and tungsten](#). Adams was the first food science researcher to document [high levels of tungsten in superfoods](#). He also discovered [over 11 ppm lead in imported mangosteen powder](#), and led an [industry-wide voluntary agreement](#) to limit heavy metals in rice protein products.

In addition to his lab work, Adams is also the (non-paid) executive director of the non-profit [Consumer Wellness Center](#) (CWC), an organization that redirects 100% of its donations receipts to grant programs that teach children and women how to grow their own food or vastly improve their nutrition. Through the non-profit CWC, Adams also launched [Nutrition Rescue](#), a program that donates essential vitamins to people in need. [Click here](#) to see some of the CWC success stories.

With a background in science and software technology, Adams is the original founder of [the email newsletter technology company known as Arial Software](#). Using his technical experience combined with his love for natural health, Adams developed and deployed the content management system currently driving NaturalNews.com. He also engineered the high-level statistical algorithms that power [SCIENCE.naturalnews.com](#), a massive research resource featuring over 10 million scientific studies.

Adams is well known for his incredibly popular [consumer activism video blowing the lid on fake blueberries](#) used throughout the food supply. He has also exposed "[strange fibers](#)" found in [Chicken McNuggets](#), [fake academic credentials](#) of so-called health "gurus," dangerous "[detox](#)" [products imported as battery acid](#) and sold for oral consumption, [fake acai berry scams](#), the California [raw milk raids](#), the [vaccine research fraud](#) revealed by industry whistleblowers and many other topics.

Adams has also helped [defend the rights of home gardeners](#) and protect the [medical freedom rights of parents](#). Adams is widely recognized to have made a remarkable global impact on issues like GMOs, vaccines, nutrition therapies, human consciousness.

In addition to his activism, Adams is an accomplished musician who has released [over fifteen popular songs](#) covering a variety of activism topics.
